## DETAILED ACTION

### *Election/Restrictions*

Applicant's election with traverse of invention group II, claims 1-39 in Paper No. 5 is acknowledged. The traversal is on the ground(s) that the method of claim 1 is required to make the device of claim 40, which is claimed as a product-by-process. This is not found persuasive because although product-by-process claims are limited by and defined by the process. The claims are examined to make a determination of patentability of the product. The product claimed in claim 40 can be made by another process as stated in paper number 4. The requirement is still deemed proper and is therefore made FINAL.

Claims 40-49 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Applicant timely traversed the restriction (election) requirement in Paper No. 5.

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-27 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Art Unit: 2811

Claim 1 recites the limitation of "... prior to bonding the one of the second and third layers to the second etch stop layer..." in line 7. The specification only discloses the third layer bonds to the patterned second etch stop layer. The specification does not disclose bonding the second layer to the second etch stop layer.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 28-39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Line 18 of claim 28 recites the limitation "... communicating with the first etch stop layer..." The scope of the claim is vague because it is not known what is meant by "communicating with the etch stop layer", since etch stop layers are not generally active regions and serve no purpose other than to help control etching during fabrication of semiconductor devices.
